Catholic Action in Myanmar

Our Feeling in this pandemic

- How is it affecting us?
 - **Pandemic affecting rate in Myanmar, 2.6 % population and death case is 3200. The catholic church of Myanmar participated to protect Covid-19 virus, doing with Corona awareness campaign, distribution Hand soap and hand sanitizer, hand wash basin and mask and providing the basic food such as rice, vegetable oil, soy bean, noddle, onion and sugar.**
- Challenging
 - **A challenging is we cannot do a seminar workshop and assembly and also We cannot do a meeting by video conferencing because of the bad connection.**
- Changing
 - **During pandemic, we had practiced washing hand and sharing the food and hygiene material to one and one. It was a positive change through this the lesson learn of the people become known how to help the other.**
- In relation to the problems already present in our realities
 - **Catholic Action contributed as volunteer of the church when the church is distributing food, hygiene for the people then Catholic Action took a delivery services.**
- Proposal for lay people in the church
 - **Now we are forcing to the member with video message which is short and clear directed information through that we can get their witness.**
 - **A big challenging in Myanmar, all the people disappointed this situation, we don't know what's happening on, we need to pray for the nation for the truth.**
